SECRET

targets. We were advised to initiate action thru Mr. [] (DIAXX-4) for magnetic tapes of any portion of the AIF we desired. It was suggested that we may want the entire file (300,000 targets) on tape but this would not be practical because of the enormous size of the file.

Inactive BE numbers: [] did not explain to our satisfaction exactly what an "inactive" BE target is in the AIF. We explained that certain BE numbers on valid electronic sites carry a BE number in Electronic OB publications but do not appear in active BE lists. The DIA representative admitted that he did not completely understand the assignment of electronic BE numbers. In addition, we explained that certain active COMIREX targets carry inactive BE numbers. He explained that his office was not involved with COMIREX targeting.

Geographic coordinate in the AIF: We noted that a 200 series chart on the Petropavlotsk area has been revised recently which indicates changes in geographic position that affect approximately 100 targets. [] explained that it would take from three-to-four months to reflect these coordinate changes in the AIF.

Direct coordination: We expressed a desire to establish direct analyst-to-analyst coordination between DIA and NPIC. DIA agreed. Meetings can be arranged via telephone.

Action required: OD will prepare a speed letter to [] requesting a magnetic tape on the inactive BE portion of the AIF.
